

MANAGING ASSETS MORE EFFECTIVELY

By digitizing your resources
and infrastructure

Centinel Software Suites

Centinel is a powerful cloud-native software suite designed to solve real business challenges.

Developed under the Centinel brand and owned by Cenmetrix, it offers a range of modular, enterprise-grade solutions tailored to various industries. From real-time visibility to audit-ready compliance and automation, Centinel helps businesses operate smarter, faster, and more efficiently.

Asset & Inventory Management Software

Track, manage, and audit your physical and digital assets with ease. This solution offers end-to-end lifecycle visibility, real-time tracking using RFID/barcodes, and automated inventory controls to reduce losses, improve compliance, and ensure operational accountability across departments or locations.

Warehouse Management Solution

Optimize warehouse operations with real-time inventory visibility, intelligent stock movements, and RFID-enabled automation. Our WMS streamlines receiving, picking, put-away, and dispatch processes, helping businesses improve space utilization, reduce human error, and enhance overall supply chain performance.

Canteen Management System

Digitize meal management with our smart canteen solution. It handles menu scheduling, meal allotment, subsidy tracking, and usage analytics.

Integrated with biometric/RFID systems, it ensures fast, cashless operations and reduces food waste while improving staff satisfaction.

An orange dump truck is positioned on a concrete weighbridge. The truck's bed is raised, and it is facing the camera. The background shows a blue sky with some clouds and a building with a red roof. The truck has a black grille and headlights. The weighbridge has a metal railing in the foreground.

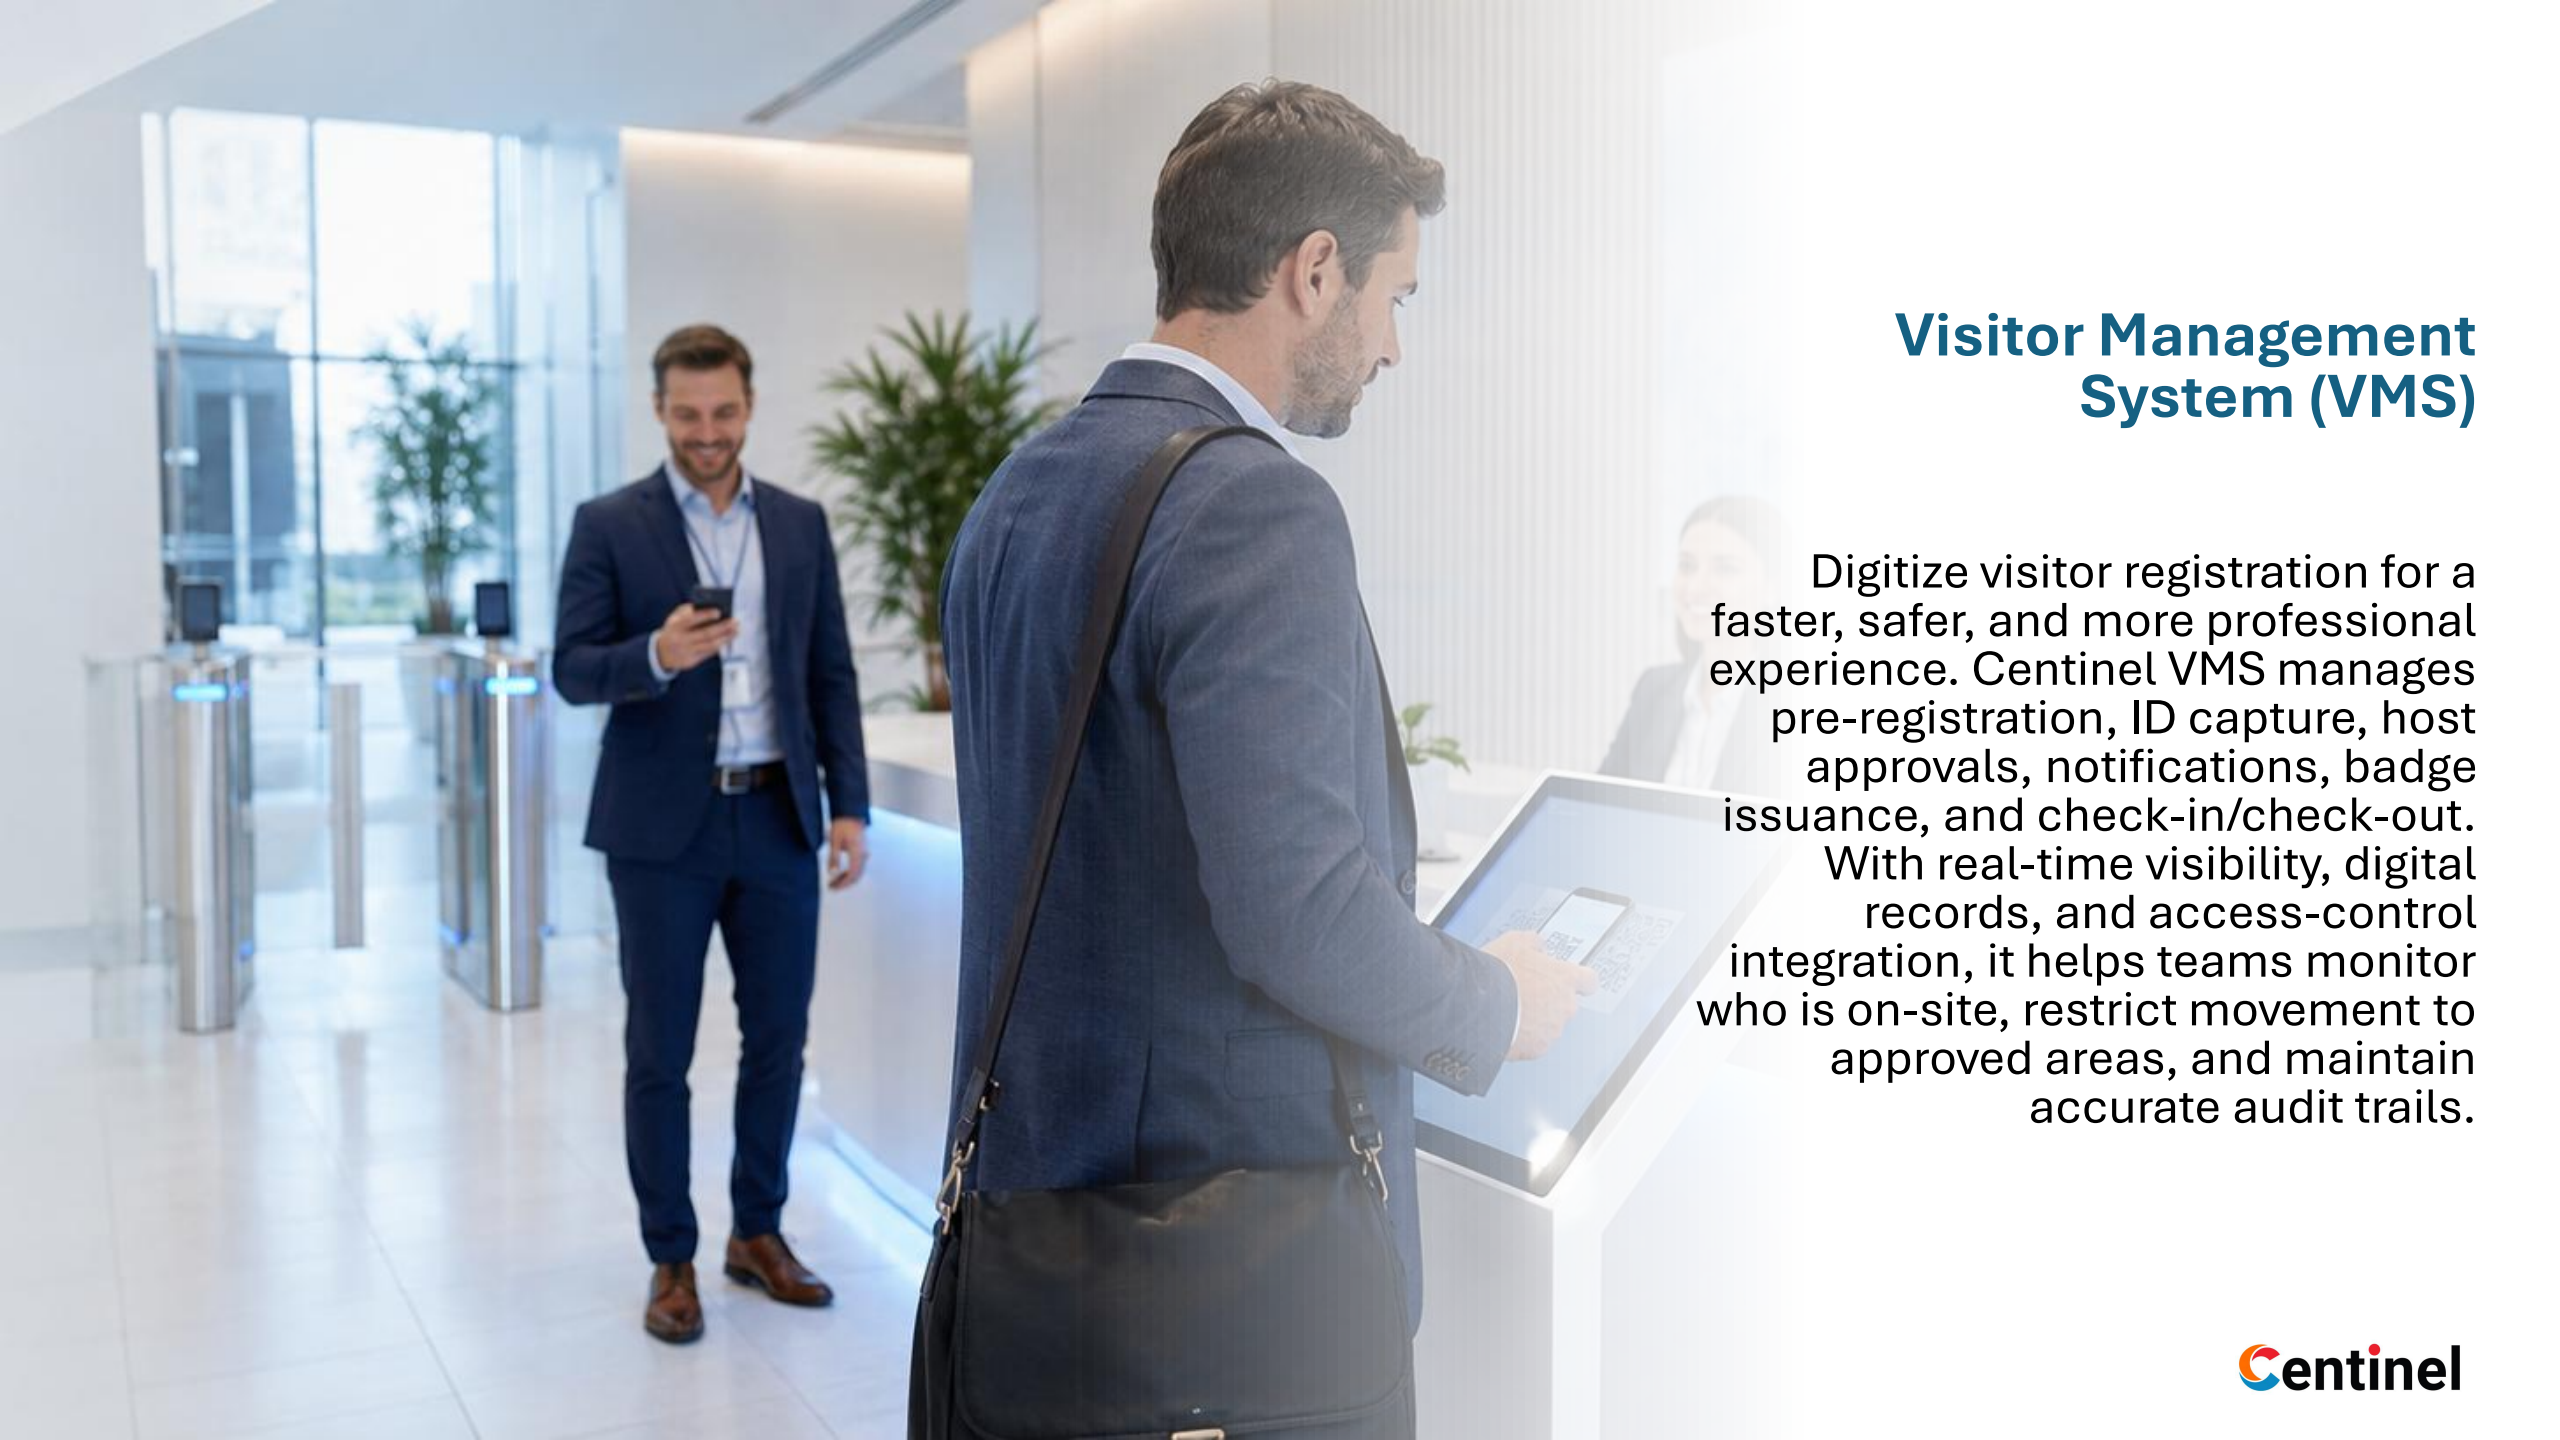

Weigh Bridge Management & Automation Solution

Automate and secure the weighing process with our smart weighbridge system. Integrated with RFID, ANPR, and digital ticketing, it captures accurate weight data, reduces fraud, and improves throughput efficiency—ideal for logistics hubs, construction sites, and industrial yards.

An aerial, high-angle photograph of a large, multi-lane parking lot. The lot is filled with numerous cars of various colors (red, blue, black, white, yellow, green) parked in neat rows. The perspective is from above, looking down at the cars, which are arranged in diagonal lines across the frame. The background is a light, hazy sky.

Parking Management System

Our cloud-based Parking Management System offers real-time monitoring and control of parking spaces across multiple locations. It streamlines entry, exit, and payment processes using RFID, ANPR, or QR technology. With live dashboards, remote access, and data analytics, it enhances efficiency, security, and the overall user experience.

A man in a blue suit and a black shoulder bag is interacting with a large, white, self-service kiosk in a modern office lobby. The kiosk has a large touchscreen display showing a registration form. In the background, another man in a blue suit is walking towards the camera, looking at his smartphone. The lobby has large windows, potted plants, and a clean, minimalist design.

Visitor Management System (VMS)

Digitize visitor registration for a faster, safer, and more professional experience. Centinel VMS manages pre-registration, ID capture, host approvals, notifications, badge issuance, and check-in/check-out. With real-time visibility, digital records, and access-control integration, it helps teams monitor who is on-site, restrict movement to approved areas, and maintain accurate audit trails.

A high-angle photograph of four business professionals (three men and one woman) sitting on large, colorful beanbag chairs (yellow and green) arranged in a circle on a wooden floor. They are gathered around a small white table. One man is pointing at a laptop screen, while the others look on attentively. The table holds a laptop, a smartphone, a glass of beer, and some papers. The scene is brightly lit, creating a professional yet relaxed atmosphere.

Empowering People, Transforming Organizations

Future of HR

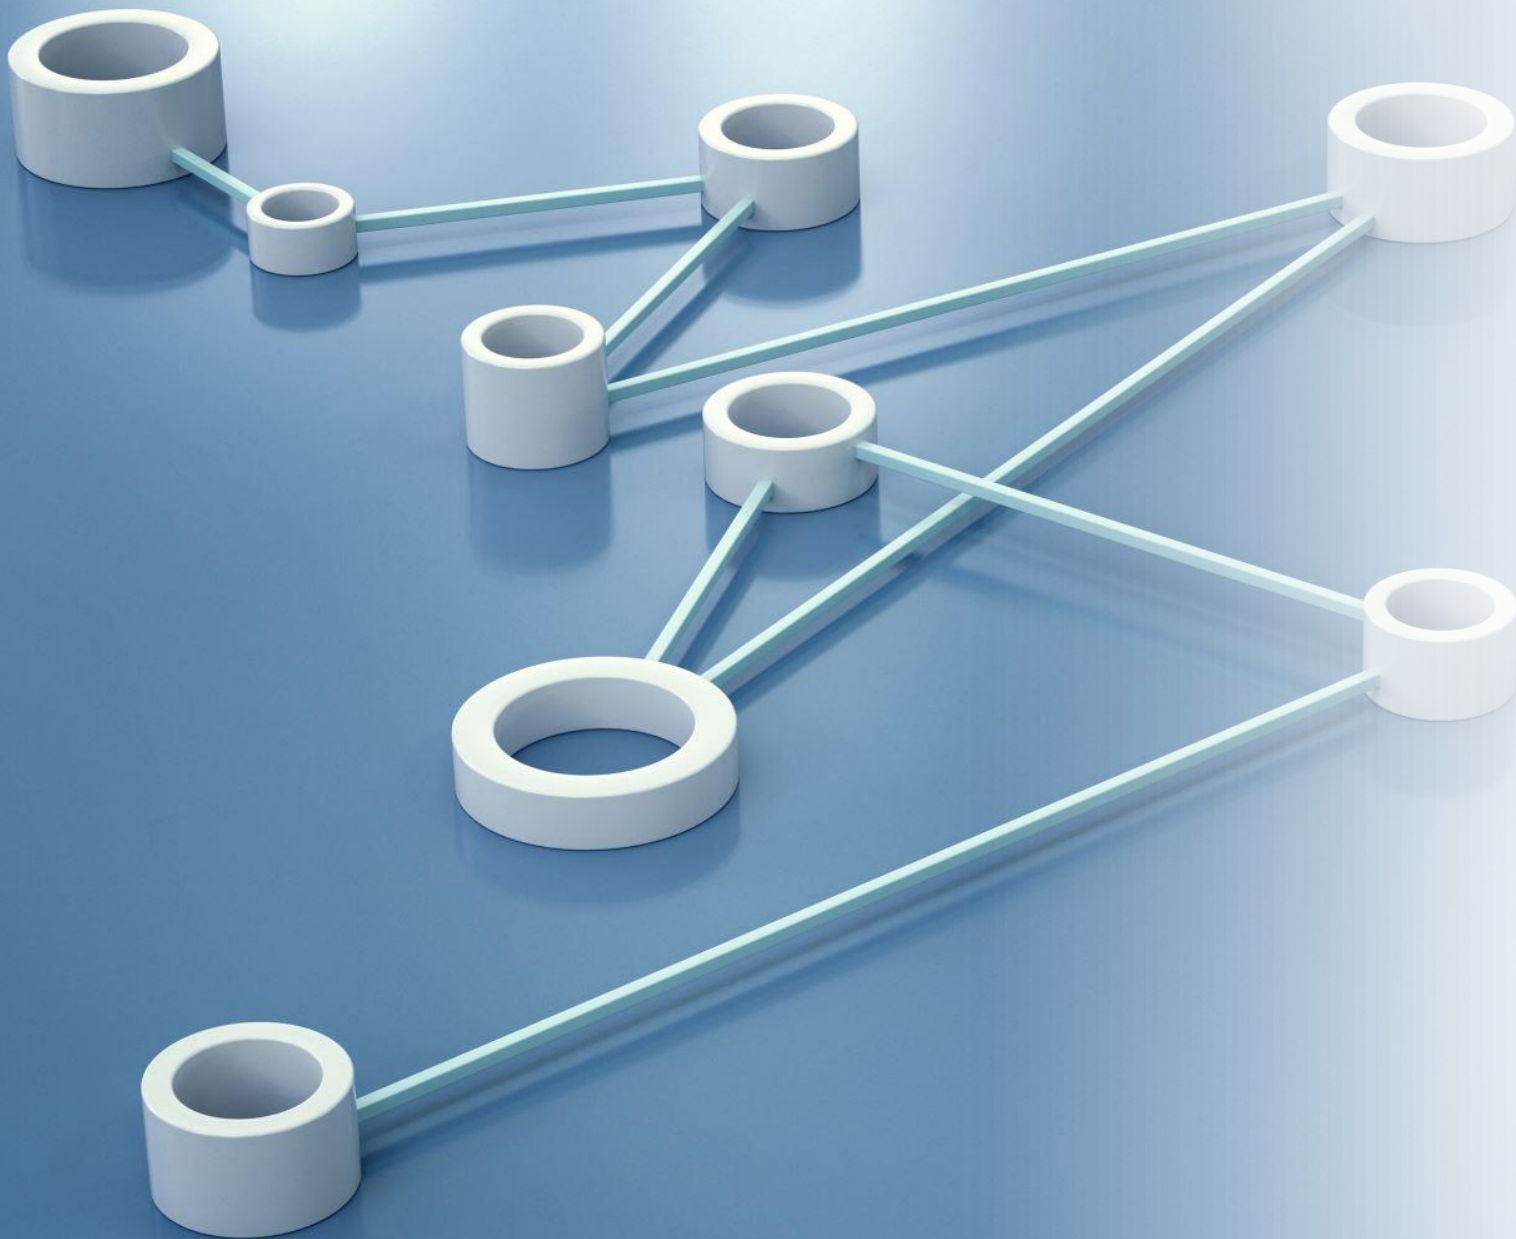

Human Capital Management (HCM)

Centralize your HR operations—from recruitment and onboarding to payroll and performance. Our cloud based HCM suite empowers HR teams with automation, analytics, and self-service tools to enhance employee experience and ensure compliance, while reducing administrative overhead.

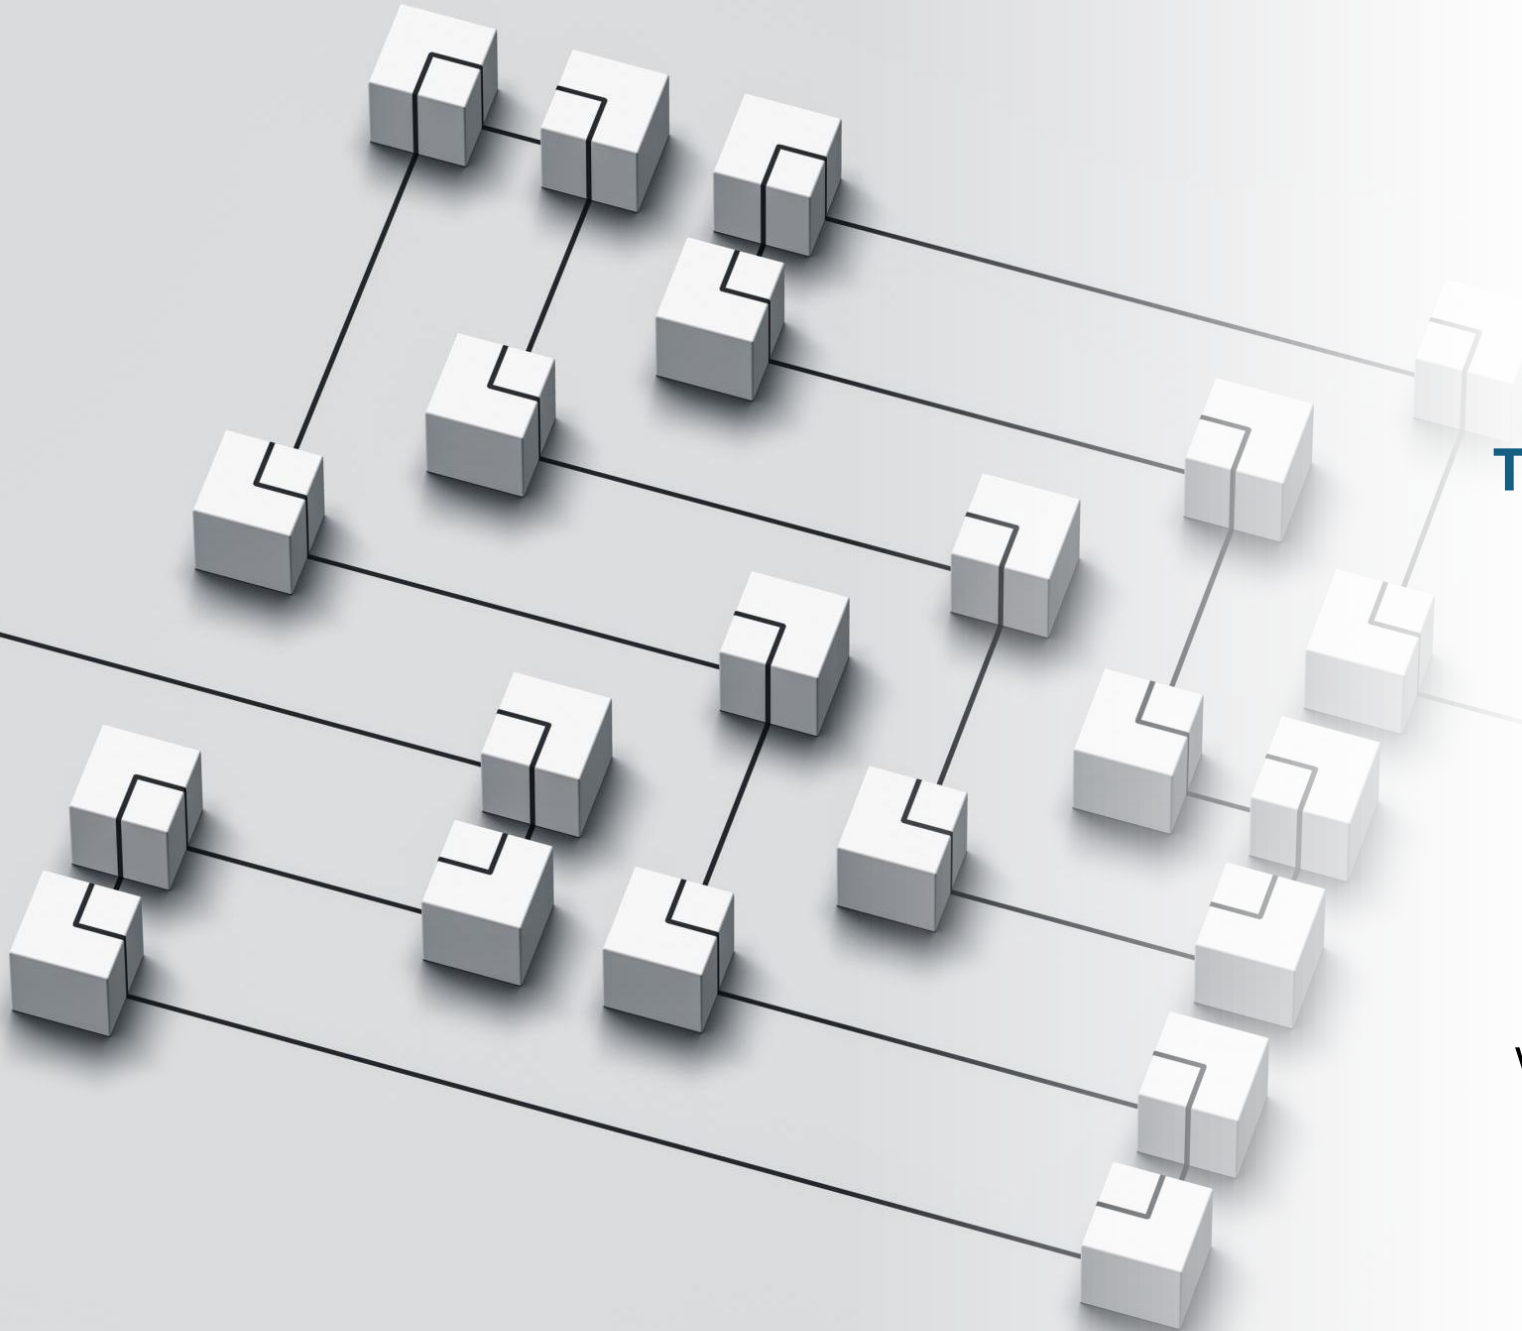

Cloud Retail Management System

A mobile-enabled retail management software that empowers field sales representatives to track daily sales across outlets, supermarkets, hypermarkets, and department stores. The app provides real-time sales data, sends instant updates to the corporate office, and allows reps to check inventory availability across multiple locations.

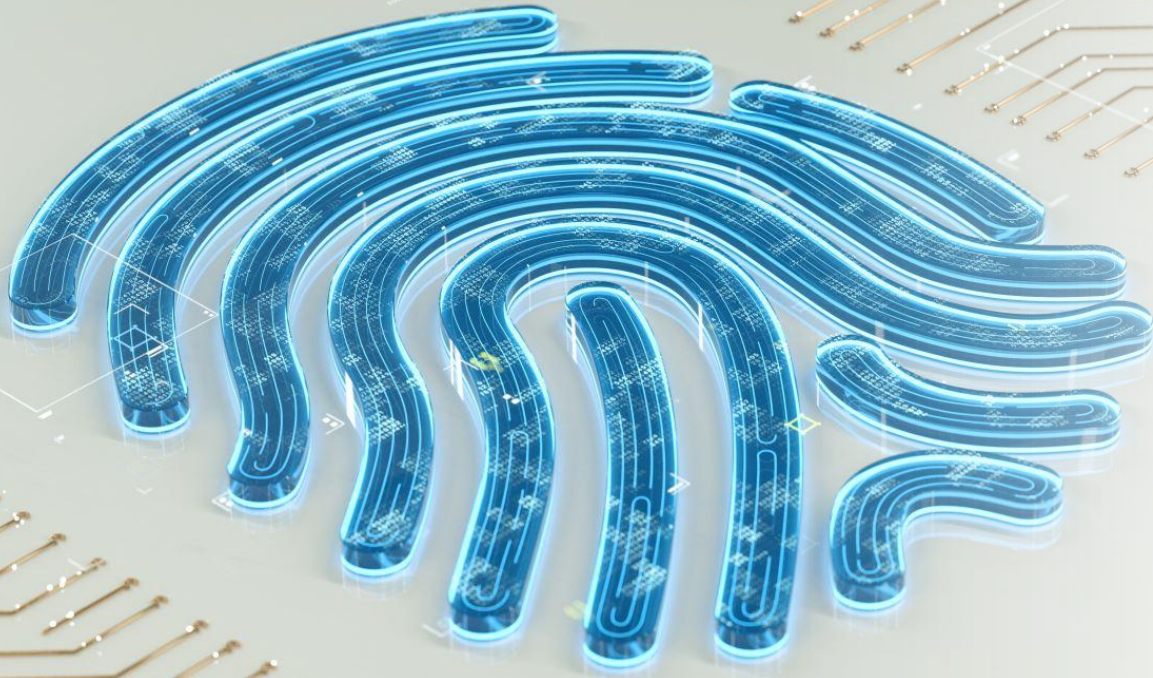

API Middleware Integration Solutions

Enable seamless system-to-system communication with API middleware platforms. It acts as a central hub to integrate ERP, CRM, HR, and custom applications—ensuring real-time data flow, faster deployments, and minimal coding for scalable digital transformation. Customized API integrations per customer requirements.

Supply Chain Traceability (Blockchain)

Gain full visibility and control over your supply chain with a blockchain based traceability platform. From raw materials to end delivery, track every step in real time. Ensure compliance, build customer trust, and respond to disruptions faster with digital transparency across the entire chain.

AFIS & Biometric Verification Solutions

Ensure secure identity verification with advanced AFIS (Automated Fingerprint Identification System) and biometric solutions. Whether for civil ID, workforce management, or secure access control, our systems offer fast, accurate fingerprint and facial recognition backed by global-standard matching algorithms and scalable infrastructure.
